

SCANNING SOLUTIONS FOR MODERN LOGISTICS

Logistics and transport companies are in a unique position when it comes to systems and documents. Whilst they use very advanced document flow IT systems at the same time there is still a lot of paper documentation in circulation. With Canon's market-leading scanners can merge these two worlds and digitise any paper-based records for further processing.

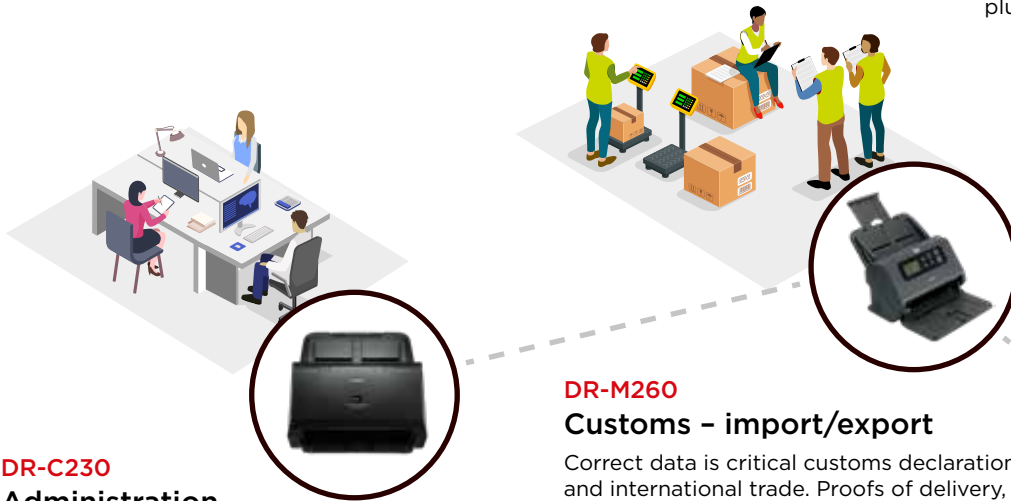

P-215II On the road / home working

Scan documents anytime, anywhere with compact, lightweight design and plug'n'play batch scanning

DR-S150 Warehousing and inventory

With this compact and productive scanner you can easily scan any inventory documentation such as orders or in/out records making sure that your records are up to date. With user log-in features you are guaranteed greater levels of security and less data related mistakes.

DR-C230 Administration

Small footprint and high productivity will help any busy administration team such as Finance or HR with quick and secure scanning of invoices, passports, identity cards or timesheets.

DR-M260 Customs - import/export

Correct data is critical customs declarations and international trade. Proofs of delivery, health certificates, export licenses or insurance certificates can easily be converted into digital format with this scanner. It also offers superior quality when it comes to text or barcode recognition and extraction.

DR-G2090/2110 Transport and despatching

Management of transportation documentation is a big challenge. Proofs of delivery, despatch notes, drivers certificates or insurance all come in variety of shapes, sizes and formats. Canon DR-G2 scanners can easily deal with high volumes of documents even in the most tricky of formats allowing for easy and secure extraction into digital systems.
